Results-driven Senior PHP/Laravel Developer with 6+ years of proven expertise designing and developing scalable, high-performance web applications. Specialized in Laravel framework, payment gateway integration (Stripe, PayPal) and optimizing large-scale database systems handling 20+ million records. Strong background in RESTful API development, full-stack development and technical leadership. Committed to delivering robust, maintainable solutions and mentoring development teams.

TECHNICAL SKILLS

Language & Frameworks: C/C++, JavaScript, Php, Laravel, Cakephp, jQuery, Ruby on Rails

Database: MySQL, PostgreSQL

Technologies & Tools: Docker, Stripe, PayPal, JWT, OpenStreetMap, WebSocket, Code Mirror, Laravel Gates, Laravel Dusk, Laravel Mix, Swagger, S3, Git, NPM, Composer, Postman

WORK EXPERIENCE

Senior Software Engineer

Zapbuild Technologies Pvt. Ltd. | Mohali, Punjab

July 2022 – October 2025 (3+ Years)

- Architected and engineered a high-scale web application using Laravel, leveraging advanced **OOP principles** and **Design Patterns** to ensure code modularity, scalability, and improvement in execution efficiency.
- Architected and maintained production-grade financial systems integrating Stripe (Payment Intents, Setup Intents) and PayPal REST APIs, including the development of complex subscription engines with automated billing cycles.

- Optimized MySQL and PostgreSQL databases handling 15+ million records with advanced indexing strategies and query optimization, reducing query execution time and improving page load performance.
- Developed an interactive code-editor interface within a **Laravel-based LMS**, leveraging **CodeMirror** to provide multi-language support and high-fidelity syntax highlighting for diverse programming environments.
- Built and documented 50+ RESTful API endpoints using Laravel with **JWT authentication**, implementing rate limiting, and error handling to support high-traffic production environments with near-perfect uptime.
- Led code reviews, established coding standards, and shared knowledge with other developers through sessions on Laravel best practices, improving overall code quality and reducing bugs.
- Accelerated the delivery of a decoupled web application by engineering a robust Cakephp API, utilizing Model Associations to streamline data relationships and significantly reduce backend development time.
- Orchestrated seamless software deployments to production servers, maintaining system integrity through continuous performance monitoring and root-cause analysis of technical issues.

Software Engineer

Netqom Software Pvt. Ltd. | Mohali, Punjab

May 2020 – July 2022 (2 Years)

- Engineered a custom location-search interface using **OpenStreetMap** and JavaScript, successfully replacing Google Autocomplete with an open-source alternative to provide seamless, cost-effective address suggestions.
- Architected a high-concurrency real-time chat system using **Laravel WebSocket's**, implementing asynchronous event broadcasting to deliver a seamless, low-latency communication experience.
- Engineered a custom **Authorization** within Laravel, utilizing **Gates** to decouple security logic from controllers and provide a centralized, maintainable permission management system.
- Managed complex version control workflows using Git, implementing branching strategies (**GitFlow**) to facilitate seamless team collaboration and ensure the integrity of the production codebase.
- Authored comprehensive technical documentation and interactive API schemas using **Swagger**, ensuring seamless knowledge transfer and reducing developer onboarding time for complex projects.

Junior Software Engineer

Talentelgia Technologies Pvt. Ltd. | Mohali, Punjab

July 2018 – Feb 2020 (1+ Years)

- Optimized application footprint by implementing custom-built search, filter, and pagination logic, replacing heavy third-party dependencies with lightweight **Raw SQL** queries and **AJAX** for a faster, more scalable user experience.
- Developed a custom **RBAC (Role-Based Access Control)** system within a Laravel environment, leveraging middleware to streamline user redirection and enhance application security.
- Developed and maintained automated testing protocols utilizing **PHPUnit** to verify RESTful API logic and **Laravel Dusk** for browser-based automation, guaranteeing high code coverage and reliability of critical business flows.
- Dedicated to continuous professional development, consistently evaluating and adopting new tools and frameworks to streamline workflows and improve application performance.

EDUCATION

Bachelor of Science in Information Technology
D.A.V College, Jalandhar

2011-2014

Relevant Coursework: Object Oriented Programming, Databases,
Operating Systems, Computer Networks, Data Structures and Algorithms
